

EX NO: 5

SEQUENCE DIAGRAM

Aim:

To design a Sequence Diagram by using Mermaid.js

THEORY:

A Sequence Diagram is a key component of Unified Modelling Language (UML) used to visualize the interaction between objects in a sequential order. It focuses on how objects communicate with each other over time, making it an essential tool for modelling dynamic behaviour in a system.

Procedure:

1. Open a project in Azure DevOps Organisations.
2. To design select wiki from menu

3. Write code for drawing sequence diagram and save the code.

```
sequenceDiagram
```

```
sequenceDiagram
```

```
CUSTOMER ->> BOOK-LOAN : borrows
```

```
CUSTOMER ->> LIBRARY-MEMBER : registers
```

```
CUSTOMER ->>{ FINE : incurs
```

```
BOOK-LOAN ->> BOOK : contains
```

```
BOOK-LOAN ->> LIBRARY-MEMBER : issued-to
```

```
BOOK ->> BOOK-LOAN : "borrowed in"
```

```
LIBRARY-MEMBER ->> BOOK-LOAN : "issued in"
```

```
LIBRARY-MEMBER ->> LIBRARY-STAFF : manages
```

```
BOOK-CATEGORY ->> BOOK : belongs-to
```

```
sequenceDiagram
```

Explanation:

participant defines the entities involved.

->> represents a direct message.

-->> represents a response message.

+ after ->> activates a participant.

- after -->> deactivates a participant.
- alt / else for conditional flows.
- loop can be used for repeated actions.
- > Solid line without arrow
- > Dotted line without arrow
- >> Solid line with arrowhead
- >> Dotted line with arrowhead
- <<->> Solid line with bidirectional arrowheads (v11.0.0+)
- <<->>> Dotted line with bidirectional arrowheads (v11.0.0+)
- x Solid line with a cross at the end
- x Dotted line with a cross at the end
-) Solid line with an open arrow at the end (async)
-) Dotted line with an open arrow at the end (async)

4. click wiki menu and select the page

Result:

The sequence diagram was drawn successfully.
